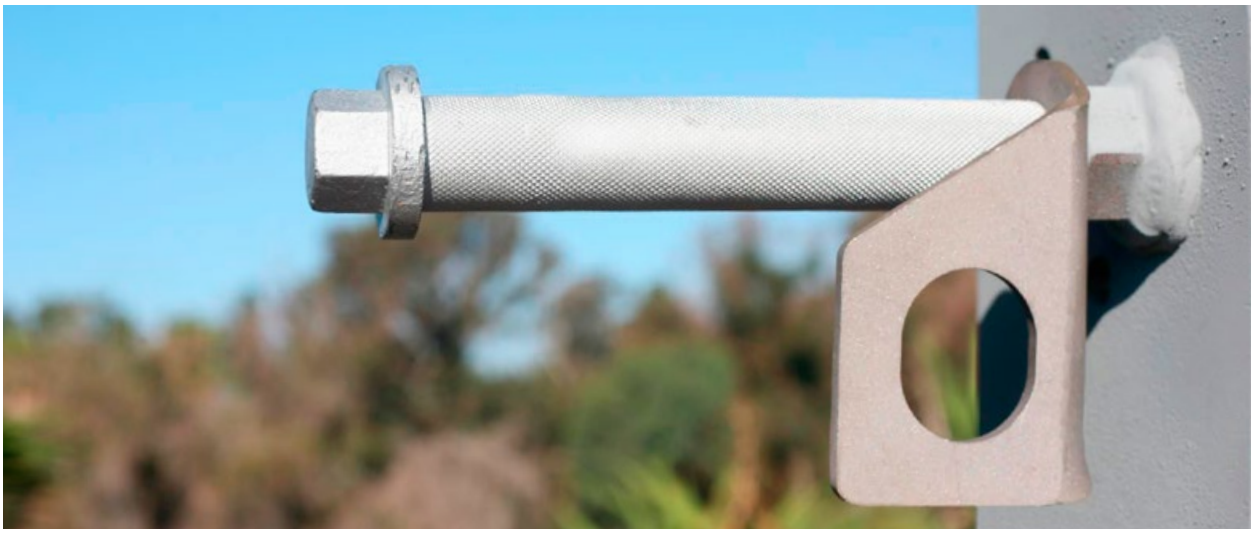
3/4” POLE STEP
WITH FALL ARREST BRACKET

APEX POWER PRODUCTS

The 3/4” Apex Pole Step with Fall Arrest Bracket is specifically designed for installation on tubular steel poles with ¾” welded nuts. It is also engineered to improve safety, ease installation and to exceed anchor load requirements of 5,000 lbs. Constructed using high quality low carbon steel materials with hot dip galvanized finish for long term corrosion protection.



3/4” POLE STEP

- Designed and engineered for tubular steel poles with 3/4” welded nuts
- High quality low carbon steel with hot dip galvanized finish
- 360° knurled foot platform for increased boot traction
- 1” diameter foot platform for improved comfort
- 15/16” Hex head size with boot stop shoulder
- Designed to prevent bolt head from bottoming against pole surface
- Hot dip galvanized finish
- Exceeds 5,000 lbs fall arrest load requirement
- Third party tested and certified

FALL ARREST BRACKET

- 7 gauge low carbon steel with hot dip galvanized finish
- 1.5” diameter hole for easy fall arrest attachment
- 360° tensile tested to exceed 5,000 lbs load requirements
- Easy installation
- Third party tested and certified
